Professional Summary

Experienced Full Stack Developer with over 4 years of expertise in building scalable web applications using Node.js, React, MongoDB, MySQL Python, and ClickHouse. Skilled in designing RESTful APIs, creating interactive user interfaces, and optimizing database performance. Proven ability to collaborate in Agile environments, deliver secure, responsive applications, and drive innovative solutions. Seeking to contribute my problem-solving and technical skills to a dynamic team.

Work Experience

Software Engineer

Justdial Ltd | March 2022 – Present

- Designed and implemented RESTful APIs using Node.js and Express.js, enabling seamless integration between front-end and back-end systems.
- Developed responsive web applications using React, HTML, CSS, and JavaScript, enhancing user engagement and accessibility across devices.
- Conducted database optimization, reducing query execution times by 30% to improve application performance.
- Collaborated with UI/UX designers to translate mockups into interactive, responsive web pages.
- Implemented user authentication and authorization mechanisms to ensure secure access to sensitive data.
- Participated in Agile processes, including daily stand-ups, sprint planning, and code reviews, ensuring project alignment with team goals.
- Monitored application performance using tools like Grafana and Kibana, proactively addressing issues to maintain reliability.

Technical Skills

- Programming Languages: JavaScript, Python, C, C++
- Frameworks and Libraries: Node.js, Express.js, React.js
- Tools: VS Code, Grafana, Kibana, Nginx, JMeter, Postman, DBeaver, SQLyog, NoSQLBooster
- Databases: MongoDB, MySQL, ClickHouse, ElasticSearch

Education

B.Tech in Computer Science and Engineering

Baba Ghulam Shah Badshah University (BGSBU), Jammu | Graduation: August 2021

Certifications

- Frontend Development | Nvjotiya Jan and Jagran: Learned React, CSS, and JavaScript
- Frontend Development Certification | Lets Grow More

Projects

1. Leads Management System

- Company: Justdial Limited
- Technologies: Node.js, React.js, MongoDB, ClickHouse, MySQL
- Description: Engineered a robust system to manage leads generated on the Justdial platform. Integrated large-scale data processing for real-time analytics and reporting.
- Key Contributions:
 - * Designed backend services with Node.js to process and store lead data efficiently.
 - * Developed a React-based frontend for lead visualization and management.
 - * Integrated MongoDB and ClickHouse for handling high-volume, fast query requirements.
 - * Ensured secure data transmission via RESTful APIs.

2. JD Tracker

- Company: Justdial Limited
- Technologies: Node.js (Express), MySQL, MongoDB
- Description: Developed a scalable system to track and analyze user searches on the Justdial platform, leveraging Kafka for real-time data streaming and processing. Designed RESTful APIs with Node.js to handle seamless data ingestion and retrieval. Collaborated on backend optimization, enabling efficient data storage in MongoDB and MySQL. Conducted end-to-end system testing to ensure reliability and scalability.
- Key Contributions:
 - * Developed RESTful APIs with Node.js for seamless data retrieval and storage.
 - * Collaborated in designing, analyzing, and testing activities.

3. Marketplace Platform

- Company: Justdial Limited
- Technologies: React.js, Node.js (Express), MySQL, MongoDB
- Description: Created a hyper-local e-commerce platform connecting consumers with local shops. Designed scalable back-end services and user-friendly front-end pages.
- Key Contributions:
 - * Developed dynamic, responsive UI components using React.js and Prime React.
 - * Implemented secure API endpoints with Node.js for transaction handling.
 - * Optimized the platform for high traffic and ensured data integrity.

4. Search Analytics Dashboard

- Company: Justdial Limited
- Technologies: React.js, Node.js (Express), MySQL, MongoDB
- Description: Developed a comprehensive analytics dashboard to provide real-time insights into company performance. Designed interactive visualizations and customized data views for users. Ensured accessibility across devices with responsive design.

- Key Contributions:

- * Built and integrated custom UI components using React.js and Bootstrap.
- * Developed RESTful APIs with Node.js for seamless data retrieval.
- * Collaborated in designing, analyzing, and testing activities.

4.API Hits Dashboard

- Company: Justdial Limited

- Technologies: React.js, Python, Nodejs, MongoDB, ElasticSearch

- Description: Developed a comprehensive API analytics dashboard to provide real-time insights into server performance. Designed interactive visualizations and customized data views for internal analysis. Ensured accessibility across devices with responsive design.

- Key Contributions:

- * Built and integrated custom UI components using React.js and Bootstrap.
- * Developed RESTful APIs with Node.js and python for seamless data retrieval.
- * Collaborated in analyzing activities.

4.AI ASSIST

- Company: Justdial Limited

- Technologies: React.js, Python, Nodejs, MongoDB

- Description: Developed an AI-powered assistant platform designed to help merchants handle customer calls efficiently by understanding user requirements in real time. The system captures customer queries, processes them using intelligent workflows, and provides actionable insights to merchants for improved customer engagement. Built responsive interfaces and scalable backend services to ensure seamless performance across devices.

- Key Contributions:

- * Built and integrated dynamic UI components using React.js for internal analysis.
- * Developed RESTful APIs using Node.js and Python for processing .
- * Designed & optimized MongoDB schemas for efficient data storage and retrieval.
